3

### **Voice dialing (dialing a number by saying a name)**

The voice dialing is available, if the voice recognition turn on, and headset connected have been set up.

1. Press multifunction key of the headset one time, you will hear a beep prompt.
2. Say the name of the person you wish to call loudly  
(Notice: That's key to make sure your mobile phone support voice dialing function)

### **Notice:**

If disconnection occurs, please check the following factors:

1. Ensure that the headset has enough power, is turned on and has been successfully paired to the mobile.
2. The Bluetooth function of the mobile is enabled.
3. Check whether the range between the headset and mobile is over 10 meters, or there is wall or other disturbance or other electrical devices between headset and mobile.
4. Bluetooth music devices or the music devices with Bluetooth connector / Bluetooth stereo dongle must support A2DP.
5. Some mobile can't support the switching between music and calling for Bluetooth connection, is caused the function lost that switch between music and phone call by headset.

### **Battery information:**

Your device is powered by a rechargeable battery. The full performance of a new battery is achieved only after two or three complete charge and discharge cycles. The battery can be charged and discharged hundreds of times, but it will eventually wear out. Please cut the connection between charger and headset when not charging. Do not leave a fully charged battery connected to a charger, since overcharging may shorten battery lifetime. If left unused, a fully charged battery will lose power with time past. Leaving the device in hot or cold places, such as in closed car in summer or winter conditions, will reduce the capacity and lifetime of the battery. Always try to keep the battery between 15 and 25. A device with a hot or cold battery may not work temporarily, even when the battery is fully charged. Battery performance is particularly limited in temperatures well below freezing. Do not dispose of batteries in a fire as they may explode. Battery may also explode if damaged.
