

TenTec Orion modifications to the Rig Blaster Pro 4 pin microphone cable and 4T8 adapter.

On the 4 pin female mic connector end of the cable with the Rj45 on the other end, strip the Green/White wire and run underneath the connector shell. The Green/White wire within the cable ties to pin 6 on the jumper block thru the Rj45. This provides PTT Ground for the Orion microphone.

CAT5 Mic cable - Rear side of jumper block

Front panel 8 pin connector - Front side of jumper

Within the 4T8, 4-to-8 pin adapter - on the 4 pin in-line male mic connector end, strip the Green/White wire and run underneath the connector shell. Connect the Green/White wire to pin 6 on the 8 pin female connector.
